Summary

React Native developer with over 1.5 years of experience building high-performance mobile apps for iOS and Android. Proficient in JavaScript, React, React Native CLI, and Expo. Skilled in state management, RESTful APIs, and performance optimization. Experienced in publishing apps to the Google Play Store and Apple App Store. I focus on writing clean, maintainable code and enjoy collaborating with teams to deliver high-quality apps.

Work Experience

SDB IT

Mobile Application Developer

Warren, Michigan, United States

January, 2024 – Present

- Designed and developed high-performance mobile applications using **React Native**, **JavaScript (ES6+)**, and **TypeScript**, ensuring smooth functionality across both **Android** and **iOS** platforms.
- Translated wireframes and mockups into interactive mobile apps while maintaining high-quality UI/UX standards using **Tailwind CSS**, **Stylesheet**, and **React Native Paper** for consistent, responsive design.
- Integrated **RESTful APIs** endpoints, and third-party libraries like **Axios**, **Redux Toolkit**, **Redux Persist**, **AsyncStorage**, and **MMKV storage** for efficient data fetching and state management.
- Ensured consistent functionality across **Android** and **iOS** platforms, leveraging **React Native's cross-platform capabilities** and testing with **Xcode** and **Android Studio**.
- Integrated **Firebase Cloud Messaging (FCM)** to manage push notifications and improve user engagement.
- Used **CodePush** (via **Revopush** and **Hot-OTA-Update**) for seamless **Over-The-Air (OTA)** updates, enabling instant bug fixes and feature releases without app store submissions.
- Utilized **Git** and **GitHub** for version control, collaborating with team members on feature development and bug fixes, implementing best practices like branching and pull requests.
- Managed the deployment process using **Expo** (for managed workflows), and **Xcode/Android Studio** to publish mobile apps to **Google Play Store** and **Apple App Store**.
- Participated in **Agile** ceremonies such as sprint planning, stand-ups, and retrospectives, using our self-developed tools [Bizcomz](#) to track progress and ensure timely feature delivery.

Technical Skills

Mobile Development

React Native CLI, Expo,
Native Module

State Management

Redux Toolkit, Redux Persist, AsyncStorage,
MMKV Storage

APIs & Integrations

RESTful APIs, Firebase Cloud Messaging (FCM), Axios

App Store Management & Publishing

Apple App Store, Google Play Store

Payment & Integration

Stripe, In-app Purchase, In-app Subscriptions

Language

JavaScript (ES6+), TypeScript, Node.js,
Express.js

UI/UX

Tailwind CSS, Reanimated, React Native Paper,
Stylesheets, Responsive Design

Version Control

Git, GitHub

Over-The-Air (OTA)

Revopush, Hot-OTA-Update, Expo Updates

Database

MongoDB

Projects:

Quick Skill (Online Learning Platform) | [App Store](#) | [Play Store](#)

Technologies: React Native CLI, Typescript, Redux Toolkit, Hot-OTA-Update, Reanimated, React Navigations, Axios, JWT etc.

Features: User Authentication, Course Video Streaming, In-App Purchase (iOS), Stripe Payment (Android), Over-The-Air with Revopush, Adjustable Playback, Quizzes and Assessments, Taking Notes, Group Discussion, Search and Discovery, Dashboard, Activity Tracking, and others.

Published: Apple App Store, Google Play Store

SkillBNK (School Management Systems) | [App Store](#) | [Play Store](#)

Technologies: React Native CLI, Typescript, Redux Toolkit, FCM (Push Notification), WebSocket, Hot-OTA-Update, Reanimated, React Navigations, Axios, JWT etc.

Features: User Authentication, Personalized Calendar to manage event, Real Time Chat Program & Courses video streaming, Community, Personalized dashboard, Progress tracking, Mock interviews, Leaderboard, Taking notes with markdown editor, Push Notifications, Over-The-Air (OTA).

Published: Apple App Store, Google Play Store

Education

Bachelor of Science in EEE

European University of Bangladesh

Dhaka, Bangladesh
